ACCESSIBLE POSTER

Poster #7 Text Version

This is the complete text of Academic Poster #7, presented in the poster's reading order. The original poster PDF and an interactive case review are available at okchildwellbeing.org/seeing-the-warning-signs. Meaningful images are described and captioned. Decorative icons that sit next to a text label are not described separately.

Seeing the Warning Signs

A Cross-System Child Wellbeing Framework to Strengthen Communication, Accountability, and Early Protection.

The poster header shows the University of Oklahoma "OU" logo.

Authors

Tracie Chapman, MSW Candidate[1]; Ami B. Bax, MD, MS[2]; Hannah Burge, MBA[3]; Sky Collins, Parent Advocate[4]

1. University of Oklahoma, Anne and Henry Zarrow School of Social Work; Oklahoma LEND Long-Term Trainee
2. University of Oklahoma Health Campus, Department of Pediatrics; Oklahoma LEND Co-Director
3. University of Oklahoma, Harold Hamm Health Campus, Department of Medicine and Hudson College of Public Health; Oklahoma LEND Trainee
4. Founder, Oklahoma Rare; Parent Advocate; Oklahoma LEND Trainee

Professions & Systems Involved

Schools ·Healthcare & Specialists ·Behavioral Health ·Courts & Family Services ·Law Enforcement ·Disability Services ·Tribal Partners ·Families & Caregivers ·Domestic Violence Services ·Community Resources ·

On the poster, each system is illustrated with a small photograph of that setting, such as a classroom, a clinician caring for a child, a counseling session, a county courthouse sign, law enforcement officers, a group of children, tribal representatives at a panel table, a family meal, a silhouette illustration of domestic violence, and a community service setting.

Problem / Why It Matters

Children often do not fall through the cracks because no one saw a problem.

They fall through because multiple systems see different warning signs, but no one connects the pattern.

This increases risk and can lead to serious and lasting harm.

A shared framework improves communication, accountability, and earlier protection.

Fictional Case Example

Jayden – 8 years old
American Indian/Alaska Native third-grade elementary-school student

Jayden attends public school and receives school-based counseling. He manages diabetes and has a Section 504 plan. He is involved in a family court custody dispute and has been exposed to domestic violence. He has had multiple visits to the school nurse for headaches and stomach pain. There are concerns about changes in mood, attendance, and academic performance.

In this fictional case, Jayden is a Cherokee boy.

Jayden, the fictional 8-year-old at the center of the case. The poster places this quote beside the photo: “I am trying my best… I just need the adults in my life to talk to each other.” —

Jayden

Project Audience

Interprofessional learners, educators, and professionals across:

- Education (K–12)
- Healthcare & Specialists
- Behavioral Health
- Child Welfare
- Law Enforcement
- Family Court / Judges
- Domestic Violence Advocacy
- Disability Services
- Tribal Partners
- Community Organizations
- Families and Caregivers

What Different Systems May See

What are warning signs?

Warning signs are changes, observations, or circumstances that may indicate a child needs additional assessment, support, or protection. They may involve physical health, behavior, school attendance, emotional well-being, family circumstances, or unmet developmental needs.

Category	Examples
School / Teachers	Attendance changes, declining performance
Physical Health	Repeated headaches, unexplained symptoms
Emotional Wellbeing	Withdrawal, anxiety, behavior changes
Family Circumstances	Caregiver stress, family conflict
Disability and Access	Unmet accommodations, interrupted services
Tribal Partners	Barriers to culturally responsive services
Systems Coordination	Disconnected records, unclear responsibilities

Jayden — The lived experience connecting all of it.

Why System Connections Matters

Child safety requires more than good intentions. It requires shared language, shared responsibility, and follow-through.

At its core, this work is about seeing the whole child, honoring family experience, and reducing suffering through coordinated action.

Pilot Learning Activity

- Learners review a fictional wellbeing case (Jayden).
- Identify warning signs, information gaps, and role-based responsibilities.
- Use Ask–Clarify–Link and SBAR to build a coordinated response.
- Develop an action plan with assigned roles and timelines.
- Reflect on what worked, what was challenging, and how to improve cross-system collaboration.

Cross-System Warning Framework

1. **Notice the Signal.** Recognize a concern or warning sign.
2. **Connect the Pattern.** Link information across people and systems.
3. **Trigger Team Review.** Engage the right people to review and assess.
4. **Clarify Roles.** Confirm who does what and how work gets done.
5. **Communicate With Structure.** Use shared language and tools (Ask–Clarify–Link, SBAR).
6. **Assign Next Steps.** Agree on actions, leads, and timelines.
7. **Document Follow-Up.** Record decisions, actions, and outcomes.
8. **Close the Loop.** Confirm follow-through and adjust plan as needed.

On the poster, each numbered step has a matching icon: an eye, connected nodes, a group of people, a checklist, speech bubbles, a signpost, a document folder, and circular arrows.

Communication Tools

Ask–Clarify–Link

Ask:
What concerns have been noticed?

Clarify:
What information is missing?

Link:
Who needs to be involved, and what happens next?

SBAR — Structured Communication

S — Situation:
What is happening?

B — Background:
What relevant information is known?

A — Assessment:
What concerns need attention?

R — Recommendation:
What action or follow-up is needed?

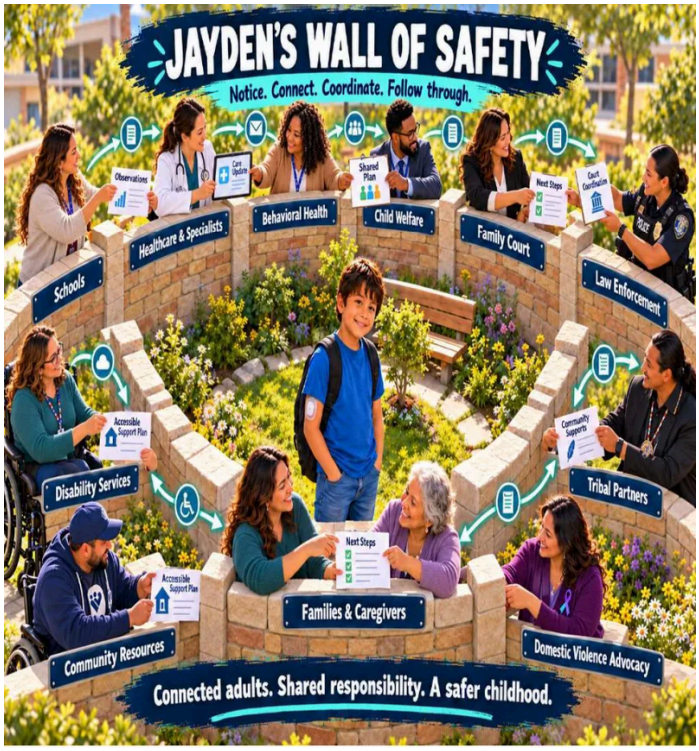

Evaluation Plan

- **Pre/post reflection survey:** learner confidence, role clarity, and communication.
- **Observation:** use structured checklist for team communication behaviors.
- **Debrief:** what worked, challenges, insights, and commitments.

Expected Impact

- Stronger role clarity
- Improved cross-system communication
- Stronger accountability and follow-through
- Earlier identification of risk
- Disability and access awareness
- More culturally responsive, family-centered decisions
- Coordinated follow-up that centers the child

Jayden’s Wall of Safety

Jayden's Wall of Safety: every system around Jayden notices, connects, coordinates, and follows through. "Connected adults. Shared responsibility. A safer childhood."

Scan and Experience the Case

Identify the warning signs. Discover the communication gaps. Explore how interdisciplinary collaboration could change the response.

One child. Multiple systems. Shared responsibility.

With gratitude to all who invest in a healthier future

Thank you, Harold Hamm, for supporting Diabetes Research, Treatment & Discovery.

Thank you to the people, partners, and communities investing in Oklahoma's children.

Working together. Seeing early. Acting together.

For every child. In every system. No one works alone. See. Connect. Protect. Follow Through.
